## Profile

I am a Flutter and frontend developer with experience building cross-platform mobile applications and web interfaces. Skilled in Dart, Flutter, and Firebase, with a foundation in responsive design and API integration. I am eager to apply my skills in mobile app development to deliver scalable and user-friendly applications. My personal projects showcase my ability to work independently and deliver quality results. I am currently seeking opportunities to further develop my skills and advance in the technology industry.

---

## Skills

### Languages

- HTML
- Javascript
- Dart

### Frameworks and libraries

- React JS
- Flutter
- Tailwind CSS

### Version Control

- GIT
  - GitHub
  - Azure Devops
- 

## Experience

### Frontend Developer Intern — Revslon Academy

Jan 2024 – Apr 2024 | Lagos, Nigeria

- Worked with React.js to build responsive web applications and implemented React Router for smooth client-side navigation.
- Collaborated with a team of interns to design and improve UI/UX features.
- Integrated REST APIs into projects for real-time data display (e.g., weather data, content feeds).
- Practiced version control using Git and GitHub, contributing to team projects in a collaborative environment.
- Gained experience with responsive design and state management that applies directly to Flutter cross-platform development.
